

# $\mathsf{CE}_{\mathsf{LVD}\,\mathsf{REPORT}}$

Prepared For :	SHANGHAI WIN-POWER CO., LTD
	A2-B-4, Tian`an iPrk, No.228, Linghu Avenue, Wuxi, Jiangsu, P,R China
Product Name:	SINGLE-PHASE ENERGY METER
Main Test Model:	DDS122-D
Prepared By :	Shenzhen BST Technology Co., Ltd.
	Building No.23-24, Zhiheng Industrial Park, Guankouer Road, Nantou, Nanshan District, Shenzhen, Guangdong, China
Test Date:	Nov. 08, 2019–Nov. 15, 2019
Date of Report :	Nov. 15, 2019
Report No.:	BST191111697401SR

Type of test object ..... See Page 1

TEST REPORT				
EN 61010-1				
Safety requirements for electrical equipment for measurement, control,				
	and laboratory use			
Par	t 1: General requirements			
Testing Laboratory Name	Shenzhen BST Technology Co.,Ltd			
Address:	Building No.23-24, Zhiheng Industrial Park, Guankouer Road, Nantou, Nanshan District, Shenzhen, Guangdong, China			
Testing location	Shenzhen BST Technology Co.,Ltd.			
Applicant's Name	IGEN TECH CO.,LTD.			
Address:	A2-B-4, Tian`an iPrk, No.228, Linghu Avenue, Wuxi, Jiangsu, P,R China			
Manufacturer	WUXI HENGTONG ELECTRONIC DEVICE CO., LTD.			
Address:	No. 68 East ZhouXin Road, Taihu Town, Binhu District, Wuxi City, Jiangsu Province, China			
Standard	EN 61010-1:2010			
Test Result	Compliance with EN 61010-1:2010			
Procedure deviation CE-LVD				
Non-standard test method:	N/A			
Trade name:	See Page 1			
Model/type reference	See Page 1			
Rating	85-265V~, 50/60Hz,40A			
Particulars: test item vs. test require	ments			
Equipment mobility	See Page 1			
Operating condition	Continues			
Mains supply tolerance	Mains supply tolerance ±10%			
Tested for IT power systems	No			
IT testing, phase-phase voltage (V)	N.A.			
Class of equipment	Class II			
Protection against ingress of water	IP 20			

Possible test case verdicts :		
Test case does not apply to the test object	:	N(.A.)
Test object does meet the requirement	:	P(ass)
Test object does not meet the requirement	:	F(ail)

General remarks:	
"(See remark #)" refers to a remark appended to the report.	Attached with:
	A. photo documentation
"(see appended table)" refers to a table appended to the report.	
Throughout this report a comma is used as the decimal separator.	
The test results presented in this report relate only to the object tested.	
This report shall not be reproduced except in full without the written approval of the testing laboratory.	
Artwork of Marking Label:

## Report No.: BST191111697401SR

	EN 61010-1				
Clause	Requirement-Test	Result-Remark	Verdict		
	b), performing a voltage test on double insulation or reinforced insulation		Р		
	c), measuring the temperature of transformer winding		Р		
4.4.4.2	Temperature of outer surface of enclosure and of parts that can be touched is checked	Comply with the standard	Р		
4.4.4.3	Protection against the spread of fire is checked	Comply with the standard	Р		
4.4.4.4	Protection against other hazard is checked	See clause 7 and 8 and 11 to 16	Р		

5	MARKING AND DOCUMENTATION		
5.1.2	Identification; equipment is identified by:		
	The equipment shall be marked with	See copy of marking plate	Р
	a) manufacturer' or supplier's name or trade mark	Ditto.	Р
	b) model number, name or other means to identify the equipment	Ditto.	Р
5.1.3	Mains supply		
5.1.3 a)	Nature of supply:		
	- a.c. RATED mains frequency or range of frequencies	50/60Hz	Р
	- d.c. with symbol 1 of table 1	Only a.c. supply	N
5.1.3 b)	RATED supply voltage(s) or range	86-265V	Р
5.1.3 c)	Maximum RATED power in W or VA, or		Р
	-More than one voltage range: separate values shall be marked, unless the maximum and minimum values do not differ by less than 20%		N
5.1.3 d)	Equipment which the OPERATOR can set for different RATED supply voltages shall be provided with means for the indication of the voltage for which the equipment is set.		N
5.1.3 e)	Accessory mains socket-outlets accepting standard mains plugs shall be marked with voltage if it is different from the mains supply voltage.:	No socket-outlets	Ν

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 6 of 28

Report No.: BST191111697401SR

	EN 61010-1				
Clause	Requirement-Test	Result-Remark	Verdict		
5.1.4	Fuses				
	There shall be a marking beside the fuseholder		Р		
5.1.5	Terminals, connections and operating devices		Р		
5.1.5.1	Terminals for connection to the mains supply shall be identifiable	Comply with the standard	Р		
	a)Function earth terminals		N		
	b)Protect conduct terminals		Р		
	c)Terminals of measuring and control circuits		Р		
	d)Terminals supplied from the interior of the equipment and which are HAZARDOUS LIVE		Р		
	e)Accessible functional earth terminals connected to accessible conductive parts		Р		
5.1.5.2	Measuring circuit TERMINALS		Р		
5.1.6	Switch and circuit-breakers		Р		
	The on-position or the off-position shall be clearly marked		Р		
5.1.7	Equipment protected by DOUBLE INSULATION or REINFORCED INSULATION		N		
	Protected throughout (symbol 11)		N		
	Only partially protected (symbol 11 not used)		N		
5.1.8	Field-wiring Terminal boxes		Р		
5.2	Warning markings:				
	- visible when ready for NORMAL USE		Р		
	- if necessary marked with symbol 14		Р		
	- are near or on applicable parts		Р		
	- advise how to avoid contact with HAZARDOUS live parts		Р		
	- TERMINAL voltage exceeding 1 kV (symbol 12)		N		
	- easily touched high temperature parts (symbol 13)		N		
5.3	Durability of markings; the required markings remain clear and legible (NORMAL USE)	Perfected	Р		

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 7 of 28

Report No.: BST191111697401SR

	EN 61010-1				
Clause	Requirement-Test	Result-Remark	Verdict		
5.4	Documentation				
5.4.1	General; equipment is accompanied by documenta	tion which includes:	Р		
	- technical specification		Р		
	- instructions for use		Р		
	- name and address of manufacturer or supplier		Р		
	- the information supplied in 5.4.2 to 5.4.5		Р		
	Definition of INSTALLATION CATEGORY		Р		
	A clear explanation of warning symbols is in the documentation, or		Р		
	information is durable and legibly marked on the equipment (see also NOTE on instructions for handling hazardous substances)		Р		
5.4.2	Equipment RATINGS; documentation includes:				
	- supply voltage or voltage range		Р		
	- the frequency or frequency range		Р		
	- the power or current RATING		Р		
	- a description of all input and output connections		N		
	- the RATING of insulation of external circuits, when such circuits are nowhere ACCESSIBLE	No external circuit	N		
	- statement of the range of environmental conditions	Max. operating temperature: 40℃	Р		
5.4.3	Equipment installation; documentation includes inst	ruction for:			
	(Stated in instruction)				
	- assembly, location and mounting		Р		
	- protective earthing		Р		
	- connections to the supply		Р		
	- requirements		Р		
	- special services		N		
	- maximal sound power level		Р		
	- instructions about sound pressure		Р

Report No.: BST191111697401SR

	EN 61010-1				
Clause	Requirement-Test	Result-Remark	Verdict		
l	Additional information for PERMANENTLY CONNE	ECTED EQUIPMENT:			
	(Hand-held /Portable equipment )				
	- supply wiring		N		
	- external switch or circuit-breaker and external overcurrent protection		N		
	- recommendation on switch or circuit-breaker location		N		
5.4.4	Equipment operation; instructions for use include:				
	- identification of operating controls		Р		
	- equipment positioning		Р		
	- interconnection requirements		Р		
	- specification of intermittent operation limits		N		
	- explanation of required symbols		Р		
	- replacement of consumables		N		
	- cleaning and decontamination		Р		
	- a statement against use in a manner not specified by the manufacturer		Р		
5.4.5	Equipment maintenance; instructions include:				
	- sufficient preventive maintenance and inspection information		Р		
	- specific battery		N		
	- any manufacturer specified parts		Р		
	- RATING and characteristics of fuses		Р		

6	PROTECTION AGAINST ELECTRIC SHOCK	
6.1.1	Requirements	Р
6.1.2	Exceptions	Ν
6.2	Determination of ACCESSIBLE parts	Р
6.2.1	Examination	
6.2.2	Opening above parts that are hazardous live	Ν
6.2.3	Opening for pre-set controls	Ν

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 9 of 28

Report No.: BST191111697401SR

EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict
6.3	Permissible limits for ACCESSIBLE parts:		
6.3.1	- values in NORMAL CONDITION	Live parts to enclosure current < 0.5mA	Р
6.3.2	- values in SINGLE FAULT CONDITION	Live parts to enclosure current < 3.5mA	Р
6.4	Protection in NORMAL CONDITION (see 6.8 and 8.1)	Base inaulation (comply with Annex D)	Р
6.5	Protection in SINGLE FAULT CONDITION; additional protection is provided as specified in 6.5.1 to 6.5.4, or		Р
	by automatic disconnection of the supply		Ν
6.5.1	Protective earthing; ACCESSIBLE conductive parts are bonded to the PROTECTIVE CONDUCTOR TERMINAL, or		Р
	are separated from parts which are HAZARDOUS LIVE (for indirect bonding of measurement and test equipment see 6.5.1.4)		Ν
6.5.1.1	PROTECTIVE BONDING consists of directly connected structural parts or discrete conductors or both		Ν
6.5.1.2	Protective conductor terminal		Р
6.5.1.3	Impedance of plug-connected equipment		Ν
6.5.1.4	Bonding impedance of PERMANENTLY CONNECTED EQUIPMENT		Ν
6.5.1.5	Indirect bonding for measurement and test equipment		Ν
6.5.2	DOUBLE INSULATION and REINFORCED INSULATION (see 6.7, 6.8 and 6.9.2)		Ν
6.5.3	A PROTECTIVE IMPEDANCE is one or more of th	e following:	
	- an appropriate HIGH INTEGRITY single component (see 14.6)		Ν
	- a combination of components		N
	- a combination of BASIC INSULATION and a current or voltage limiting device		Ν
	Components, wires and connections are RATED as required		N

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 10 of 28

Report No.: BST191111697401SR

	EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict	
654	Automatic disconnection of the supply			
	-supplied with the equipment		N	
	- rated to disconnect the load		N	
	- rated for the maximum rated load		N	
6.6	Connections to external circuits			
6.6.1	Connections to external circuits shall not			
	- cause Accessible parts of the external circuits to become hazardous live in normal condition		N	
	- Nor cause accessible parts of the equipments to become hazardous live in normal condition		N	
6.6.2	TERMINALS for external circuits		N	
	TERMINALS which receive a charge from an internal capacitor; measured voltage (V); charge:		N	
6.6.3	Circuits with TERMINALS which are HAZARDOUS LIVE			
	No mains circuits are connected to ACCESSIBLE conductive parts		N	
	For other HAZARDOUS LIVE circuits with one TERMINAL contact at earth potential		N	
	Circuits designed to be operated with one ACCESSIBLE TERMINAL contact floating		N	
6.6.4	Accessible terminals for stranded conductors		N	
6.7	CLEARANCES and CREEPAGE DISTANCES	(See attached table 6)		
6.7.1	General requirements		Р	
6.7.1.1	Clearances		Р	
6.7.1.2	Creepage distance		Р	
6.7.2	Main circuits	(see appended table 6)	Р	
6.7.3	Circuits other than mains circuits			
6.7.3.2	Clearance values where table 5 does not apply and for circuits in measurement		N	
6.7.3.3	Creepage distance values		Ν	
6.7.4	Measuring circuits		Р	

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 11 of 28

Report No.: BST191111697401SR

	EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict	
6.7.4.1	Clearance values		P	
6.7.4.2	Creepage distance values		Р	
6.8	Procedure for dielectric strength tests			
6.8.1	Reference test earth		N	
6.8.2	Humidity preconditioning	40℃, 96%RH	Р	
6.8.3	Conduct of tests		Р	
6.8.4	Voltage tests		Р	
6.8.4.1	Altitude correction of test voltages for checking clearances in homogeneous construction		Р	
6.9	Constructional requirements for protection against electric shock			
6.9.1	General;			
	- security of wiring connections		Р	
	- screws securing removable covers		Р	
	- accidental loosening		Р	
6.9.2	ENCLOSURES of equipment with DOUBLE INSULATION or REINFORCED INSULATION			
	ENCLOSURE surrounds all metal parts		N	
6.9.3	Over-range indication			
6.9.3 a)	Analogue meters with stops at the exact ends of the range		N	
6.9.3 b)	Digital meters which show a low value when the true value is above the maximum		N	
6.9.3 c)	Chart recorders which print a trace at the edge of the chart		N	
6.10	Connection to mains supply source and connection	s between parts of equipment		
6.10.1	Mains supply cords		N	
6.10.1 a)	This cords shall be rated for the max current and meet the requirement IEC60 227 or IEC 60245 or certified or approved by a recognized testing authority		N	

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 12 of 28

Report No.: BST191111697401SR

EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict
6.10.1.b)	If a cord is likely to contact hot external parts ,it shall be made of suitably heat-resistant material		N
6.10.1c)	Required temperature RATING		N
6.10.1d)	Green/yellow covered conductors are used only for connection to PROTECTIVE CONDUCTOR TERMINALS		N
6.10.2	Fitting of non-detachable mains supply cords		
	The cord enters the equipment:		
	- inlet or bushing with a smoothly rounded opening		Ν
	- insulated cord guard with specified projection 5 D		Ν
	cord anchorage:		
	- the cord shall not be clamped		Ν
	- knots in the cord are not be used		Ν
	- cannot push the cord into the equipment to an extent which could cause a hazard		N
	- failure of the cord insulation in a cord anchorage which has metal parts shall not cause accessible conductive parts to become hazardous live		N
	-Generally compression bushing shall not be used as a cord anchorage		N
	-the cord anchorage shall be designed so that cord replacement does not causes a hazard and it shall be clear how the relief from strain is provided		N
6.10.3	Plugs and connectors		
6.10.3 a)	Plugs, connectors and appliance couplers, comply with the relevant specifications		N
6.10.3 b)	mains type plugs and sockets are not used incorrectly		N
6.10.3 c)	Plug pins of cord-connected equipment receive a charge from an internal capacitor; the pins shall be hazardous live 5s after disconnection of the supply	No such equipment	N
6.10.3 d)	Equipment with accessory mains socket-outlets:		
	- if outlets can accepts a standard mains plug there is a marking according to 5.1.3 e)		N

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 13 of 28

Report No.: BST191111697401SR

	EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict	
	- if the outlets with a PROTECTIVE EARTH TERMINAL the input mains supply shall include one		Ν	
6.11	Disconnection from supply source			
6.11.1	Equipment shall be provided with a means for disconnecting it from each operating energy supply sources		Р	
6.11.1.1a)	Intended for supply only from a low energy source such as a small battery		N	
6.11.1.1 b)	Intended only for connection to an impedance protected supply		N	
6.11.1.1 c)	Which constitutes an impedance protected load		N	
6.11.2	Requirements according to type of equipment			
6.11.2.1	Permanently connected equipment and multi- phase equipment		N	
	Permanently connected equipment and multi- phase equipment shall employ a switch or circuit- break as the means for disconnection		Ν	
	If a switch is not part of the equipment ,following shall be specified:			
6.11.2.1 a)	A switch or circuit-breaker shall be included in the building installation		N	
6.11.2.1 b)	It shall be in close proximity to the equipment and within easy reach of the OPERATOR		N	
6.11.2.1 c)	It shall be marked as the disconnecting device for the equipment		N	
6.11.2.2	Single-phase cord-connected equipment		N	
6.11.2.3	Hazards arising from function		N	
6.11.3	Disconnecting devices		Р	
6.11.3.1	Switches and circuit-breakers		Р	
6.11.3.2	Appliance couplers and plugs		N	
7	PROTECTION AGAINST MECHANICAL HAZARD	OS		
7.1	Operation shall not lead to a mechanical hazard in normal condition or single fault condition	Operation can not lead to a mechanical hazard	Р	

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 14 of 28

Report No.: BST191111697401SR

	EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict	
7.2	Moving parts not able to crush, etc. (see also 6.12.32.3)		Р	
7.3	Stability	Secured before operation		
	- titled in each direction to an angle of 10° from its normal position		N	
	-force test applied in all directions except upward		N	
	-force test applied to downwards		N	
7.4	Provisions for lifting and carrying.	•		
	Handles or grips withstand 4 times the weight of the equipment		N	
	Equipment 18 kg has means for lifting or carrying,		N	
7.5	Wall mounting	•		
	Mounting bracket withstand a force of four times the weight of the equipment		N	
	No damage to the bracket or the mounting surface after the test		N	
7.6	Expelled parts			
	Equipment contains or limits the energy of parts which could cause a hazard if expelled in the event of a fault	No such parts	N	

8	MECHANICAL RESISTANCE TO SHOCK AND IMPACT	
	Equipment shall not cause a hazard when subjected to shock and impact likely to occur in normal use.	
8.1	Enclosure rigidity test	Р
8.1.1	Static test	
	The equipment is held firmly against a rigid support and subjected to a force of 30N applied by the hemispherical end of a hard rod of 12 mm diameter	Ρ
8.1.2	Dynamic test	
	Bases,covers,etc.,intended to be removed and replaced by the operator have their fixing screws tightened using a torque likely to be applied in normal use	Р

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 15 of 28

Report No.: BST191111697401SR

EN 61010-1			
Clause	Requirement-Test	Result-Remark	Verdict
8.2	Drop test	< 20Kg, 100mm	Р
9	PROTECTION AGAINST THE SPREAD OF FIRE		
	There shall be no spread of fire outside the equipme fault condition ,	ent in normal use or in single	Р
9.1	Eliminating or reducing the sources of ignition withir	n the equipment	
9.1a)	The voltage ,current, power is limited as specified ir at different potentials did not cause ignition	9.3 or Insulation between parts	Р
9.1b)	Ignition hazard related to flammable liquids is reduced to a tolerance level as specified in 9.4		Р
9.1c)	In circuits designed to produce heat, no ignition occurs when tested in any single fault condition which could cause ignition		Р
9.2	Containment of fire within the equipment, should it occur		
	The risk of the spread of fire outside the equipment is considered to be reduced to a tolerable level		Р
9.2.1	Constructional requirements		
9.2.1a)	Insulated wire shall have a flammability classification FV-1 or better		Р
9.2.1b)	The enclosure shall meet the following requirement :	Metal enclosure	
	-The bottom shall have no opening or, constructed with baffles or, be made of metal or, be a metal screen with a mesh		Ν
	-the sides shall have no openings within the area that is included within the inclined line C in figure 7		N
	-the enclosure ,and any baffle or flame barrier ,shall be made of metal of non-metallic materials having a flammability classification of FV- 1 or better, of IEC 60707		Ν
	-the enclosure ,and any baffle or flame barrier ,shall have adequate rigidity		Ν
9.3	Limited-energy circuit		
	Limits of maximum available current		Р
9.4	Requirements for equipment containing or using flammable liquids		Р

Building No.23-24,Zhiheng Industrial Park,Guankouer Road,Nantou,Nanshan District,Shenzhen,Guangdong,China Certificate Search: http://www.bst-lab.com, Tel: 400-882-9628, 8009990305, E-mail:christina@bst-lab.com Page 16 of 28
